About Us

AMIT GROUP is a group of Technology Companies associated with commitment in the form of Joint Stock Company, the group members operate in a variety of fields of Information Technology to support, improve capacity and develop together

AMIT GROUP focuses on the field of Outsourcing and ODC, building individual software and hardware solutions according to the requirements of businesses with modern technologies and platforms.

In addition, AMIT GROUP also focuses on supply chain and logistics solutions such as WMS warehouse management software system, TMS transport management, comprehensive management system for garages (passengers)... There are also a number of other software - hardware solutions for applications in enterprises, factories...

Vision - Mission - Core value

Vision

Becoming a prestigious technology innovation center of Vietnam and Southeast Asia in the next 10 years

Mission

Accompanying businesses to develop by applying advances in information technology to business and administration

Core value

Responsibility - Dedication - Creativity - Breakthrough

Our Strengths

We have experience in building and developing software and operating software for many years for many domestic and foreign clients

We build a pretty full team of roles from SA, QA, QC, BA, PM, UX, UI, Front End, Back End, iOS, Android, DevOps, AI, Blockchain,... to build and operate the software system according to the process in a methodical and standard way, while ensuring technology capability and quality on many different scales.

We have specialized personnel and cooperate with experts in various fields such as manufacturing, aviation, human resources, quality management, risk management,... to build solutions that suit clients needs in a variety of fields.

Proactive, responsible, dedicated, constantly learning and improving are our working spirit so that each product that we make receives satisfaction and trust from clients.

Software Development Services

iOS DEVELOPMENT

We use modern programming languages like Swift and Objective-C, as well as proven technologies and approaches that make it easy for us to upgrade and scale our products.

ANDROID DEVELOPMENT

We have an experienced team specializing in developing applications for Android devices including smartphones, tablets, TVs, smart watches, etc. in Java and Kotlin languages.

WEBSITE DEVELOPMENT

We use new technologies like Ruby on Rails, Go, JavaScript, AngularJS, React, Node.js and Elixir to develop and design Websites for each Business and responsive across interfaces.

BLOCKCHAIN DEVELOPMENT

We bring blockchain solutions to Enterprises to help create trusted and secure decentralized applications to automate Business operations.

UX/UI DESIGN

With a team of User Interface Designers knowledgeable in design and technology, and a team of User Experience Designers who have business knowledge and understand users, we will help businesses create products that provide a satisfying user experience.

EMBEDDED SOFTWARE & AI

We provide services in the form of embedded software for automotive, home, office and smart factory devices; Software intelligent processing AI such as face recognition, image recognition, camera detection.

Software Development Services

OFFSHORE DEVELOPMENT CENTER

We provide a team of developers with highly specialized skills for foreign software outsourcing activities of enterprises at a reasonable cost.

PLATFORM MODERNIZATION SERVICES

We develop new systems and upgrade existing platforms to provide better software solutions for large and small businesses .

BUSINESS ANALYST SERVICES

We analyze and identify business needs and offer solutions that are suitable for specific business goals.

IT STAFFING SERVICES

We provide quality developers to supplement your team's resources.

Project management
SCRUM FRAMEWORK

We apply the SCRUM FRAMEWORK in software development according to Agile method - a flexible software development method to bring products to users in the fastest way to maximize value for clients.

Human Resources' Capacity

02

Our Leaders

He Graduated in Aeronautical Engineering from HCM City University of Technology. Before becoming CEO, he spent 9 years working in the Aerospace Industry, in charge of optimizing operational resources and flight safety testing, auditing external resources inside and outside to ensure quality and safety requirements. During his working process, he has focused and accumulated many skills such as Lean, Performance Management, QAM, SMS,...

Mr. Nhat Anh Tran (Richard)

Co-Founder
Chief Operations Officer

With more than 10 years of experience in building the "Tang Thu Vien" community, Mr. Le Quoc Thao is a person with good team connectivity. In February 2019, he founded AMIT Group Joint Stock Company - a professional unit in the field of software design and development. Thanks to the accumulated experience of more than 10 years, it has helped him build and connect the members of AMIT GROUP together effectively, helping to promote the capacity of AMIT GROUP..

Mr. Thao Le Quoc

Founder
General Director

Graduated with a Bachelor's Degree in Computer Science & Software Engineering from the University of Information Technology. Currently, he has 13 years of experience in the field of information technology and services, diverse and strong in both programming and project management. He is also well versed in C++, Mobile Applications, Ontology, Java and Navigation Systems skills and is a solid project and program management expert.

Mr. Ngoc Tu Nguyen (Leo)

Co-Founder
Product Manager

Graduated with Bachelor of Information Technology from University of Science and Technology, Master of Information Technology. He is also a Lecturer in the Faculty of Information Technology - HCMUT since 2016. Besides, he has more than 10 years of experience in embedded development and implementation of many projects on/off campus.

Mr. Bach Nguyen
IoT Team Leader

Graduated from both FPT University and Hanoi University of Science & Technology, he now has 5 years of experience in Android and iOS development. In addition, he also has experience in project management and is currently the leader of AMIT GROUP in Hanoi, taking on the main role of large projects with global customers.

Mr. Anh Tran
Ha Noi Branch Director

Graduated with Master's degree in Artificial Intelligence from National Chung Cheng University in Taiwan. He has more than 4 years of experience in the software industry: the first year as a software engineer, 3 years later working in the field of AI. He has a solid background in electronics, embedded programming, and IoT.

Mr. Dang Nguyen
Team Leader Ai and Blockchain

Graduated in Software Engineering in 2004. He has more than 17 years of experience in software, 6 years of intensive focus on logistics solutions (warehouse management, transportation).

Mr. Tien Pham
Leader of Software Solutions in Logistic

3 years experience being in charge of development and management in a Japanese electronics factory; 6 years on research and development power converters. Currently doing his PhD on machine learning algorithm for energy systems optimization and security.

Mr. Bang Nguyen
Business Development in the US

He has 12 years of experience in ERP implementation for projects such as:

- Pharmacies/Pharmaceuticals: 400 pharmacies nationwide.
- Clinic: My Thanh General Hospital

Besides, he also won the First Prize of Vietnamese Talent 2014

Mr Duong Tran
ERP Leader

Our Resources

Since its establishment, AMIT GROUP has been shaped as a "GROUP", we link many Technology Companies together to share and optimize resources, increase competitiveness as well as provide better services for clients

After a 3-year journey, AMIT has gathered and associated with 7 member companies and nearly 200 employees with all positions from UX UI Designer, Front-end, Back-end, Business Analyst, Quality Control, System Architect,.... together with experts in many different fields to meet the needs of clients.
